

Supplementary Materials

Title of the Manuscript

First A. Author, *Fellow, IEEE*, Second B. Author,nd Third C. Author*, Jr., *Member, IEEE*

THE Supplementary Materials should either be organized in sections as per the main manuscript body (using up to 4,000 words) or it should be used to provide readers with a set of up to 10 additional display items (i.e. figures and tables). Figures and tables should be prepared using the same format and guidelines as per the main body of the manuscript. References should be included using the same format utilized in the main body of the manuscript. We encourage authors to include a Supplementary Materials section with their manuscript. If so, the authors should include a short section (about 1 or 2 paragraphs) in the main body of the manuscript summarizing the content of the Supplementary Materials section.
